25 Max per class, first come, first served! Thank you!

Great Gravity!

Explore the wonderful world of gravity and see how everything is pulled towards the centre of the Earth - even you! Explore how gravity and air resistance work together and against each other! Discover the amazing pulling power of our planet.

Moving Motion

Learn about the science of movement. Your mad scientist will show you amazing forces. Impress your family and friends with amazing boink. Carry on discovering motion at home!

Energy Burst

Ever wondered where energy comes from? Well, you will soon find out! We will race rubber band cars, play with catapults and you get your very own bouncing toy!

Light Fantastic

Do you know what LASER stands for? in this brilliant session you can bend light, see a laser light show, explore UV light and take away your own diffraction glasses

Acids and Bases

Shine pennies, balance acids and learn all about indicators with lots of fun experiments. Learn to test pH with indicators and paper. Get your own reaction tube to test the pH of your food at home.

Sonic Sounds

Discover the way that sound travels through solids, liquids and gases (and which is best?!) Why are vibrations so important when making sounds? Make your very own indoor storm!

Space...The Final Frontier

Fly off into space with this exciting look at our solar system. Learn about planets, stars and what happens when meteorites strike the Earth! Get your own NASA to take home too.

Matter of Fact

Take a look at everything around you and see what it's made of! Make your own molecules and make Mad Science Silly Putty!!!
(SYSTEM 1)
