

Black History Month

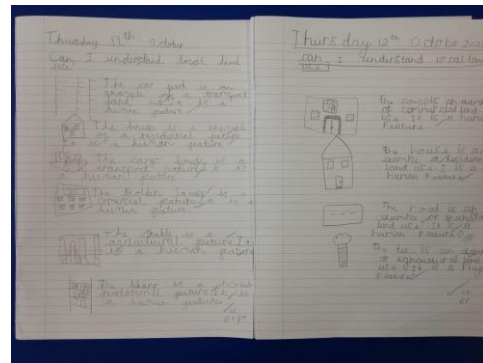

To celebrate Black History Month this October, Year 3 have learnt about the incredible athlete Jesse Owens. They focused on how he overcame adversity within his career, and created vibrant information posters to inform others about his life. One of the children also created a fantastic page in their reading scrapbook about him, using a non-fiction book to find information.

"I chose to research Marcus Rashford as he is one of my favourite footballers and an important black person." - **Cruz**

Geography

Through this month, Year 3 have focused on settlements. They have researched to learn the difference between linear, nucleated and dispersed settlements, and considered different types of land use (residential, commercial, agricultural, transport and recreational) and sorted real-life examples into these categories. They are gearing up to an exciting piece of fieldwork in the local area, where they will use OS maps to assist them in finding features that show types of land use.

"I enjoyed drawing and writing about the different features in our local area like the park, the roads, and the shops." - **Pandora**

My Happy Mind

Year 3 have adopted our 'MyHappyMind' scheme brilliantly. Every Monday morning, they have begun their week with reflection on how they feel, and what they can do to make sure their mental wellbeing is where it needs to be. They love the journals as they allow them to express their learning however works best for us - in pictures, sentences, or lists.

"I enjoyed taking part in the Happy Breathing as it made me feel calm and relaxed." - **Florence L**

"I enjoyed learning about team H-A-P: hippocampus, amygdala and prefrontal cortex." - **Jack**
